

**Predoc and Postdoctoral Training Positions**  
**Submit Nominations by January 15, 2021**

Predoc and Postdoctoral trainee positions with the Tissue Engineering and Regeneration Training Grant (TEAM) are available for budget year July 1, 2021 - June 30, 2022 (Year 45).

**Eligibility for Predoc position:**

- The student must be working towards a PhD or dual DDS/PhD
- They may not have a prior doctoral degree (DDS, MD, PhD).
- The **applicant must be a US citizen or permanent resident.**
- Nominee must have NRSA Eligibility
- Student Trainees are required to participate in the Core Training Requirements while actively funded through the T32 grant.

**Eligibility for Postdoc position**

- The candidate must have a doctoral degree (DDS, MD, PhD)
- The candidate must be **US citizen or permanent resident**
- Nominee must have NRSA Eligibility
- All trainees are required to participate in the Core Training Requirements during the months funded through the T32

**Funding:** The Grant covers NRSA allowable tuition, Stipend, Health and Dental Benefits, and \$800 towards travel to support trainee research. (Travel support must occur within the Yr 45 budget period of 7/1/2021 – 6/30/2022). **Note:** Tuition and benefit shortfalls will be the responsibility of the home Unit/program/department and Rackham; Differential in stipend between UM program-level and NIH-level will be the responsibility of the mentor and cannot be taken from other Federal funds.

**Nomination Procedure:** Please submit the information directly to the TEAM Mbox via email:  
[TEAM\\_No.lw1wf941xdbnsdp8@u.box.com](mailto:TEAM_No.lw1wf941xdbnsdp8@u.box.com)

The Mentor and the nominated student should work together to provide the following items:

- TEAM Application Face Page
- academic record (transcript from most recent institution) of the nominee,
- the nominee's curriculum vitae
- description of the nominee's research and career goals, and relevance to tissue engineering
- Three confidential letters of recommendation are required and can be submitted by the mentor or sent via email to: kimbsmit@umich.edu.

An emphasis is placed on those performing collaborative research between two mentors in complimentary research fields (e.g., biomaterials and signal transduction).

Nomination packets must be received to the email above no later than January 15, 2021. The TEAM Operating Committee will then meet to complete the trainee selection. These nominations will then be included in the NIDCR Progress Report.

If you have questions, please contact Kimberly Smith via email [kimbsmit@umich.edu](mailto:kimbsmit@umich.edu)

Sincerely,

David Kohn, MSE, PhD
