

## Mini-Residency in Dental Sleep Medicine

The University of Michigan School of Dentistry is offering a Mini-Residency in dental sleep medicine for licensed dentists, providing more than 100 hours of CE credit. The program will expand participants' understanding of dental sleep medicine, competence to treat sleep-related breathing disorders with custom oral appliance therapy and confidence working with patients, physicians, and medical insurance. This clinically-focused, evidence-based program is divided into two parts transpiring over a 1-year time period and includes pre-recorded, live in-person, and live streaming lectures, on-site hands-on clinical training, as well as guided self-study elements.

The Mini-Residency is accredited by the American Academy of Dental Sleep Medicine (AADSM).

**Participants successfully completing the program will be eligible to take the board to become Diplomates of the American Board of Dental Sleep Medicine.**

### Summer 2024

*Registration opens May 1, 2024 and closes on September 15, 2024.*

# Why Michigan?

- Expertise: Courses are taught by 10 U-M faculty representing the Schools of Medicine and Dentistry. Over 17 advanced education degrees and 15 board certifications are represented in this group, as well as directorships of 11 different advanced speciality and clinical programs. Faculty have won numerous awards for excellence in didactic and clinical teaching. Two faculty have been full-time private practitioners in Dental Sleep Medicine for more than 27 years.
- Limited class size.
- Held at the newly-renovated University of Michigan School of Dentistry.
- Clinical instruction will occur in the School's newly completed Advanced Clinical Education (ACE) facility. This facility consists of 20 semi-private dental chairs, providing hands-on opportunities to learn techniques for examinations, bite registration, digital and PVS impressions, fitting and adjusting of oral appliances and morning aligners and intra-oral photography.
- Didactic courses will occur in the newly remodeled classrooms adjacent to the ACE Clinic.
- Representatives from dental laboratories and suppliers that specialize in dental sleep medical products will share products and services.
- Course participants will visit the Sleep Disorder Clinic to see how polysomnography studies are performed and to have the opportunity to discuss sleep study details with a Registered Sleep Technologist.
- One of only two American Academy of Dental Sleep Medicine accredited Mastery Program providers. Accredited program attendees are eligible to earn AADSM Qualified Dentist designation and can apply for the ABDSM certification exam.
- Program includes board reviews and study groups.
